ABSTRACT

A series of data tables are presented, detailing the demographic makeup and academic success of those students at the Florida state universities who had transferred from the Florida community colleges. The tables, which include fall term data for 1978 through 1980, classify the transfer students by age, sex, race, date of entry into the university, number of quarter hours transferred from the community college, number of quarter hours earned toward a degree, community college of origin, grade point average (GPA), and academic major. Selected findings, based upon a comparison of the three years, indicate that the precentage of females transferring to the universities increased between 1978 and 1979, but remained constant between 1979 and 1980. The percentage of Blacks decreased between 1978 and 1980, while the percentage of Hispanics decreased from 1978 to 1979, but increased between 1979 and 1981. Most students earned more than 90 quarter hours before transferring to the university. While at the university, 85% of the transfer students earned a GPA of 2.0 or higher. University GPA varied from major to major, but was consistently higher for those transferring after earning 90 quarter hours than for those transferring with fewer credit hours. The total mean GPA of the transfer students decreased only slightly from 1978 to 1980, while the standard deviation remained constant. Tables present data by university and, in some cases, by college of origin. (KL)

INTRODUCTION

One of the major functions of Florida's community colleges is to provide curricula through which students may prepare themselves for entry into the universities' upper division instructional programs. Consequently, the community colleges and the Division of Community Colleges are concerned about the academic progress of those students transferring to the state universities of Florida.

The Articulation Agreement of 1971 between the Division of Community Colleges and the Division of Universities provides for the encouragement of research conducted cooperatively by the two divisions. Articulation reports have been published by the Division of Community Colleges since 1973. These reports utilize data on former Florida community college students who were in the State's universities as far back as 1971. In 1974, the State University System (SUS) established the Student Data Course File which contains a rather complete record of all students enrolled in the universities. Since that time a stable data format has been maintained enabling one to compare groups of students over time. This report includes data for the Fall term for three consecutive years, 1978, 1979, and 1980.

The reader will typically be interested in comparing a specified sub-group of students over time - those from a given community college, those at a given university, those in a particular major, etc. It is virtually impossible to note all possible trends of interest found in the following tables. However, the information is there for the reader to search out. Because of the volume of data presented, only brief comments will be made concerning the tables and concentration will be on the totals.

Each table will contain summary statistics on undergraduate students in the nine state universities - Florida Agricultural and Mechanical University (FAMU), Florida Atlantic University (FAU), Florida International University (FIU), The Florida State University (FSU), The University of Central Florida (UCF), The University of Florida (UF), The University of North Florida (UNF), The University of South Florida (USF), and The University of West Florida (UWF) - who prior to enrolling in the SUS were students at one of Florida's 28 community colleges (see inside back cover). Most tables will include students enrolled in the Fall term in 1978, 1979, and 1980.

Table 1 presents the frequencies of undergraduate students, at the state universities of Florida, whose college of last attendance was a Florida community college. The table indicates that the total number of transfer students increased steadily from 1978 to 1980. Males outnumbered females generally although the two groups are usually almost equal.

Table 2 indicates that the percent of Blacks decreased between 1978 and 1980 and this pattern generally held at all universities. The percent of Hispanic decreased from 1978 to 1979, but increased between 1979 and 1980.

Table 3 shows that the mean age of transfer students has remained stable over the three-year period. The percent of transfers age 30 and under decreased slightly from 85.6 in 1978 to 85.0 in 1979 and remained stable in 1980. The percent of over 30-year olds was considerably higher at UNF than at other universities.

Table 4 indicates that the greatest percent of students was in the first year of study in each of the three years. This percent averaged 42.7 in 1978, dropped to 40.3 in 1979 and increased to 41.4 in 1980. The second largest group had been in the SUS up to two years. Percents of transfers who have been in the SUS longer drop off substantially each year indicating that students tend to complete their program or otherwise leave after two to three years. It should be noted that prior investigation of these data shows that the majority of students enter the SUS in the Fall quarter.

Table 5 reports the number of quarter hours transferred by students into the universities. Data for FAU, FIU, and UNF are questionable. Students have been reported transferring less than 90 quarter hours when in fact these universities are upper division institutions. The table shows clearly that the largest group of students each year transferred after earning 90 quarter hours (60 semester hours) at the community colleges. The percent who transferred at least 90 quarter hours ranged from 68.4 at FSU in 1979 to 95.6 at UWF in 1978. Except at FSU, this percent appears to be consistent at each university over the three-year period. Since the Associate in Arts degree exceeds at least 90 quarter hours, this would indicate that the students are probably utilizing the community colleges extensively to complete lower division work before moving on.

Table 6 shows the number of hours earned toward a degree at both the community college and the university. For the information in Table 6 to be more meaningful, one needs to know the amount of time spent in

Percents in Tables 7 and 8 remained fairly stable over the three-year period. Upon close inspection, the reader will note that most students transferred to the university nearest their community college. Table 7 reports column percents, orienting this table toward universities and Table 8 reports row percents, orienting this table toward community colleges. No particular trends are noted over the three-year period.

Table 9 clearly shows that most transfer students (84.9% to 85.5%) earned a grade-point average (GPA) of 2.00 or higher in the SUS. GPA in the SUS is based on a 4.0 system and is calculated by dividing grade points earned by credit hours attempted. Since many GPA's equal to zero represented erroneous or missing data, these were grouped separately.

Table 10 enables the reader to compare two groups of Fall 1980 transfer students - those who transferred before earning 90 quarter (60 semester) hours at the community college and those who transferred after earning 90 quarter hours. Since the table is lengthy, 1978 and 1979 data are not shown for individual universities. However, these are available in prior editions of Articulation. Enough information is given for one to compare any two groups of interest. By and large, the GPA earned at the university was higher for those who transferred after earning 90 quarter hours, the usual requirement for the AA degree. GPA's reported are means of individual GPA's. In all tables reporting GPA, zero or missing cases were excluded.

Table 11 presents the same type of data as Table 10. Here are shown SUS totals for 1978, 1979, and 1980. For each of the years, the groups transferring after earning 90 quarter hours earned a higher mean GPA than did the group transferring prior to earning 90 quarter hours. The information indicates that an increasing proportion of community college students are earning 90 hours or more to transferring. In 1978, 70.7% of the students had earned 90 or more hours before transferring, in 1979, 74.5% had earned 90 or more hours, and in 1980, 74.7% had earned 90 or more hours.

Table 12 presents the mean GPA earned at the university for all students found in Table 10. Again, data for 1978 and 1979 were omitted because the table is lengthy.

Table 13 reports SUS total mean GPA's for transfer students from each community college for the years 1978, 1979, and 1980. It is quite noticeable that the total mean GPA has decreased only slightly while the standard deviation (S.D.) remained constant.

Table 14 shows the number of students in each major field of study by university. Each of these groups is divided into two subgroups - those whose GPA was 2.00 or higher and those whose GPA was below 2.00. Mean GPA for the major is reported in the final column. As with Table 10 and Table 12, data are presented for Fall 1980 only.

Table 15 presents data similar to Table 14, but allows one to make comparisons in the SUS for the years 1978, 1979, and 1980.
